

Direct Thermal Labels

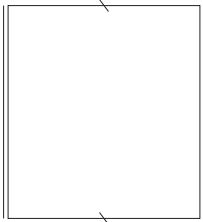

Matrix Label Systems' **Direct Thermal** Labels are manufactured from only high quality paper stock and have been thoroughly tested to withstand the heat applied during direct thermal printing. Our Continuous Roll Labels have been produced on top quality material with no splices. We have updated the design with a 3/32" margin on one side to assist in removing the label from the liner. These labels are primarily used for shipping systems connected to a scale platform. However, many of our customers have found them to be valuable in various tailored applications.

To Order: Select your direct thermal label and contact us today at **800.962.7256** or by fax at **317.839.8496**.

- Material: High Quality Bright White direct thermal papers
- Compatible with the listed direct thermal printers
- Poly bagged to eliminate scuffing and moisture during transport and storage
